## HISTORY

Founded in 1975, COGIT SpA is an established company specialised in industrial building. During the first years, their principal client is ENEL Spa, where lots of works have been realized in Brindisi territory in the Hydro electric power plant of Brindisi Nord and Brindisi Sud (Cerano) Following COGIT did expand their activities in all areas of civil engineering, streets, pipelines, water treatment plants, holiday villages, maritime works, being able to offer complete operations with their own company facilities starting with feasibility studies; becoming so a well-known General Contractor in domestic territory.

During the years the company gets more qualified and counts among the suppliers of important private holdings and engineering companies such as EDISON, SNAMPROGETTI, SARAS, TECNIMONT, TECHINT and public bodies in general.

In 1997 COGIT achieves the ISO9001 quality management certification to attest the building process characterized since ever in customer satisfaction and respecting of contract requirements.

During the 90's, acquires important skills in marine works for the laying of submarine pipeline and the realization of wharfs, also in works of ambiental engineering such as canal revaluation and ground reinforcing works for the consolidation of slopes as well as water treatment plants.

During the last years the SOA certification is renewed for the following classifications: OG1(VIII), OG3 (V), OG6 (V), OG7 (I), OG11 (IV), OS21 (III) and OS22 (IV) starting cooperations with partners of international level such as TORNIO, DEGREMONT, EMIT, BONATTI which led to the realization of important projects in the domestic market.

In 2003, with the conviction that innovating processes is the challenge for market competition, shares a scientific research project with the CETMA Consortium and the Engineering University of Napoli, Lecce e Cosenza for the developing of new tecnologies in the consolidation and restructuring of brigde structures.

## FUTURE OUTLOOK

The first years of their activities the company operated in the industrial sector , mostly in local territory the following years the company turned its attention to the public works sector with the realization of important contracts on the domestic market the company's peculiarity as well as its expanding power is the fact of cooperating with large groups who operate on the national and international market as temporary association for the realization of great public works, the future, moving on solid bases and the achievement of consolidated experience in managing great work orders is oriented towards internationalizing and acquisition of more detailed specialization and particularly concerning the restauration of storical and artistic properties as well as the fulfillment of maritime works and plant engineering. From 2000 on the company turned its attention on the settlement of a team of young, highly skilled individuals trained for managing national and international work orders, supported by personnel with up to 30 years of working experience.

COGIT tends towards research, in 2002 , as a matter of fact, cooperates with several italian universities in research projects for the developing of innovative technologies in order to regenerate public property infrastructures.
